## DE-SE1 & DE-SE2

Made in USA

### The "SE" series of MVS Mobile Digital Recorders

The MVS-DE-SE mobile vehicle DVR has no moving parts making it our Best Value vehicle video camera system choice, able to endure very harsh environments making them well suited for high risk vehicle applications like school bus, law enforcement, EMS, transit, taxi, service or delivery vehicles.

When it comes to tough, durable and long lasting data storage it is hard to beat the 100% Solid State digital storage of the SE SSD based "Extreme Series" mobile video camera surveillance systems, uniquely suited for mobile vehicle surveillance. SE internal SSD memory can withstand 50Gs of shock during operation, without damage, while a standard hard drive can only handle a few Gs during operation before they crash. SE Solid State SSD based DVRs can offer a vehicle digital video recorder memory storage device that is expected to outlive the vehicle.

### The #1 connective, versatile & expandable mobile video recorder made in the USA

- Free 5-Year Warranty on Made in USA DVRs, American Programming, American Manufacture
